Forecast for Monday 15 May 2023

Weather: Dry with clear spells or lengthy clear skies developing overnight. After a chilly start, it will be largely dry with sunny spells during Tuesday morning. However, the clouds will bubble up in the afternoon, which will lead to a mixture of sunny spells and scattered showers. The showers could be locally heavy and possibly thundery at times. However, some places will escape the showers altogether and stay dry throughout the day. Any showers will fade into the evening to leave dry and clear conditions.

Chance of cloud-free hill tops above 600m: 100% throughout, prehaps reducing to 80% in any showers during the afternoon.

Low cloud and visibility: Cloud bases will be above the summits throughout, perhaps lowering slightly in any showers during the afternoon. Visibility will be very good or excellent, with distant hills and peaks clearly visible, temporarily reducing to poor in any heavy showers that develop in the afternoon.

Meteorologist's View

UV levels will be High, therefore, it is advisible to wear sun protection if spending any length of time walking or hiking in the hills or valleys. There will be an added wind chill on the summits, therefore, extra layers are advised for spending any length of time on the summits. Be aware of the potential for any heavy showers developing in the afternoon, which may lead to some wet and slippery surfaces underfoot.

Forecast for Tuesday 16 May 2023

Weather: Dry with clear skies overnight and feeling chilly. Tuesday morning will be dry with lengthy spells of sunshine, after a chilly start. However, turning increasingly cloudy from the north, although this will break up to give a mixture of sunny spells and scattered showers in the afternoon. Some of the showers are likely to be locally heavy and possibly thundery in places. Any showers fading by the evening, with clear spells developing.

Maximum wind: Northwesterly 15-20 mph, gusting to 25-30mph. Added wind chill on the summits.

Chance of cloud-free hill tops above 600m: 100% throughout, reducing to 60% in any showers during the afternoon.

Low cloud and visibility: Cloud bases will be mostly above the summits throughout, perhaps a temporary lowering in any heavy showers, probably close to the summits. Visibility should be very good, although temporarily reducing to poor conditions in any heavy showers during the afternoon.

Temperature: **Valleys:** Plus 4 Celsius, becoming Plus 16 Celsius.
At 600m: Plus 2 Celsius, becoming Plus 8 Celsius.
Freezing level: Above the summits.
